

A large yellow excavator with the Lawson Group logo is demolishing a multi-story brick building. The excavator's arm is extended high, reaching into the upper floors of the structure. Debris is visible at the base of the building. The sky is clear blue, and a small airplane is visible in the distance.

GROUP

RESHAPING THE FUTURE

With over three decades of experience, Lawson Group is a prominent name in the UK, specialising in Demolition and Licensed Asbestos removal services. Trusted by leading contractors and developers, we handle diverse projects, from bespoke work to multi-million-pound endeavors. Comprising Lawson Demolition and Lawson Environmental, we offer comprehensive expertise, ensuring safety and timely completion for any project.

WHAT STRUCTURES WE WORK WITH:

- High-Rise Building
- Concrete Structures
- Listed Buildings
- Warehouses and Factories
- Residential Housing
- Roads and Bridges

DEMOLITION

Demolition encompasses more than just physically bringing down structures; it involves meticulous planning, ethical considerations, accountability, and adherence to high standards in health, safety, and environmental practices. Lawson Demolition, a division of Lawson Group, is committed to upholding strict regulations and ensuring the well-being of our employees, clients, and the public.

Our approach involves collaborating closely with clients to develop comprehensive plans that cater to every aspect of the demolition project. Our team of expert demolition engineers, accredited by IDE (Institute of Demolition Engineers), meticulously craft methodologies that leave no room for oversight, addressing all potential risks and contingencies.

At Lawson Group, we prioritise ethics, professionalism, and high standards in executing demolition work. Projects may include enabling works, partial demolition, preserving listed facades, soft stripping, and handling temporary works.

WHAT ABOUT WASTE?

We possess full licensing credentials granted by the Health and Safety Executive, authorising us to engage in the safe management and removal of asbestos, alongside holding official licenses from the Environment Agency to operate as both a certified transporter and dealer for non-hazardous waste materials. On average, our sites reuse and recycle 96% of waste. We fully support recycling initiatives and are committed to supporting Zero Waste To Landfill Schemes diverting as much waste as possible away from landfill.

We promote environmental responsibility through on and off-site recycling and waste management techniques that benefit the environment and offer cost savings to clients. Detailed Site Waste Management Plans (SWMP) are prepared for each project assisting Clients in meeting BREEAM targets.

LAWSON ENVIRONMENTAL

Lawson Environmental, part of Lawson Group, is fully licensed by the HSE to undertake work with asbestos ensuring legal compliance for asbestos removal whilst offering a one stop solution for demolition. Streamlined planning and comprehensive expertise ensure safety. Our highly trained team prioritises health and safety, delivering meticulous planning and detailed project closure reports. Combining demolition and asbestos removal seamlessly, we provide efficient services with skilled staff and advanced equipment, prioritising client satisfaction and environmental responsibility.

SOCIAL VALUE

Lawson Demolition is dedicated to enhancing the social, economic, and environmental well-being of local communities. We actively collaborate with our clients to align projects with our social value objectives, striving to meet the Social Value Act 2012 requirements by working with Local Authorities, we implement strategies to deliver social value to the local community effectively.

We prioritise local employment opportunities by hiring and training site operatives from the area. We also work with local recruitment agencies for labour and management needs. Additionally, we offer work experience placements, graduate trainee roles, and apprenticeships, providing valuable mentoring support for students.

In the realm of environmental responsibility, we employ local procurement to reduce shipping and transport emissions, implement resource-efficient practices to minimise waste, and control measures to reduce vibration, noise, and air pollution.

Community engagement is a continual process, with an appointed Site Manager responsible for communication with neighbours, businesses, and residents. We readily participate in public consultations when required. We also prioritise reusing materials within the community and donating recyclable items to relevant establishments.
